How does RegimA Work?

We do not believe in just peeling the skin, one must repair and restore at the deeper skin level, however one always has the fear that one is going to thin the skin. The secret is within the formulation of RegimA PEEL AND HEAL, which cannot be compared to any other peeling product. We gently remove the outer layer of dead skin and work down to the dermis (the living layer): The formulation then stimulate collagen production. In essence RegimA 'PEEL AND HEAL' is thickening and re-elasticizing the skin.

The products have a low Ph acidity that is essential in achieving perfect skin penetration (something pH balanced products cannot do), working gradually through the outer dead layer to the basal living layer of the skin.

Who can be helped by RegimA?

- All skin types: Including the most sensitive.
- White, Black, Asian skins.
- Female & Male.
- All age groups: Even safe for young skins.
